Decision Hubs

Tools For the people who make healthcare work

WellStack accelerates your path to insight-so you can spend less time waiting and more time acting.

Decision Hubs deliver precision insight and show what to do next.

Financial RCM Hub

Reveal the revenue you're missing.

- Identify denial patterns and root causes
- Distill underpayments by payer and service line
- Monitor AR metrics in real time

Population Risk Hub

Prioritize care before risk becomes cost.

- Stratify by health risk to spotlight high-need patients
- Flag rising-risk profiles for timely outreach
- Examine trends in care access and utilization

Operations Hub

Run operations like a data-driven command center.

- Real-time visibility with zero operational blind spots
- Optimize throughput, capacity, and length-of-stay (LOS)
- Improve access, efficiency, and overall patient flow

ACO Hub

Align care quality, utilization, and spend — before CMS tells you how you did.

- Evaluate provider performance on cost, quality & use
- Analyze overuse, inefficiencies, and leakage
- Monitor population shifts and patient growth

Quality Hub

Hit every measure. Flag every issue. Deliver better care.

- Track HEDIS, STAR, and regulatory benchmarks
- Monitor safety indicators like infections and readmissions
- Flag patients missing chronic condition documentation

What Our Clients Are Saying

"You can't act on an old data. WellStack's Decision Hub lets us see the full picture in real time - it's self-service, easy to understandand lets us drill down when we need to. That's a game changer."

— Terri, Guthrie Clinic

"When you look at the outcomes Wisconsin has achieved - measurable improvements in quality, cost savings in the billions - it's clear we're doing something different. That difference is the data & it's powered by WellStack"

— Gabriel, WCHQ

Outcomes

6x faster implementation than legacy platforms

30–40% lower cost through automation

<2 weeks to onboard new data sources
